

USP Safety Switches

925 & 926 Safety Pressure Rolls

Pressure Mats

USP's Pressure Mats are the Simple and Effective solution to entry and restricted area protection. Engineered to last, these rugged mats are time tested to withstand the harshest use. With units in the field still operating flawlessly for over 35 years, our quality is second to none.

About USP Safety Switches

USP Safety Switches has supplied quality switch products to industries for 50 years with proven performance in more than 100 million installations. Installers rely on, and specify USP for the most innovative switch products available.

Our 925 and 926 pressure mat rolls are an excellent choice for hard to protect areas. Simple operation, low cost, ease of installation, and most importantly, no false alarms, make USP Pressure Safety Mats ideal for area protection.

Applications

Safety alert, for machine operators working in the proximity of hazardous equipment.

Fall alert, mezzanines and other areas where protective barrier is disabled.

Security alert, for unauthorized entry into high risk or valuable inventory areas.
