

USP Safety Switches

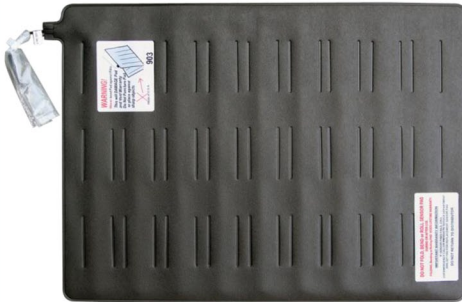

900 Series Safety Switch Mats

Pressure Mats

USP's Pressure Mats are the Simple and Effective solution to entry and restricted area protection. Engineered to last, these rugged mats are time tested to withstand the harshest use. With units in the field still operating flawlessly for over 35 years, our quality is second to none.

About USP Safety Switches

USP Safety Switches has supplied quality switch products to industries for 50 years with proven performance in more than 100 million installations. Installers rely on, and specify USP for the most innovative switch products available.

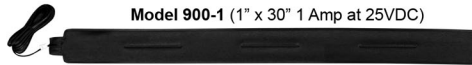

Our 900 series pressure mats are an excellent choice for hard to protect areas. Simple operation, low cost, ease of installation, and most importantly, no false activations make pressure mats ideal for entry and area protection. All Pressure Mat models are made in America from high quality materials and 100% tested before shipping.

Applications

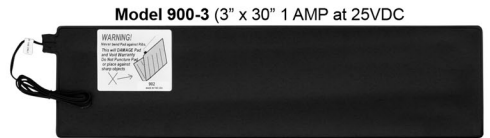

Safety alert for machine operators working in proximity of other hazardous equipment.
Security alert for unauthorized entry into high risk or valuable inventory areas.
